Quick Start

Here's a simple example of a page that displays a [pie chart](#):

You can copy the snippet below to a file on your computer and open it in your browser to display the pie chart shown above:

```
<html>
<head>
  <!--Load the AJAX API-->
  <script type="text/javascript" src="https://www.google.com/jsapi"></script>
  <script type="text/javascript">

    // Load the Visualization API and the piechart package.
    google.load('visualization', '1.0', {'packages':['corechart']});

    // Set a callback to run when the Google Visualization API is loaded.
    google.setOnLoadCallback(drawChart);

    // Callback that creates and populates a data table,
    // instantiates the pie chart, passes in the data and
    // draws it.
    function drawChart() {

      // Create the data table.
      var data = new google.visualization.DataTable();
      data.addColumn('string', 'Topping');
      data.addColumn('number', 'Slices');
      data.addRows([
        ['Mushrooms', 3],
        ['Onions', 1],
        ['Olives', 1],
        ['Zucchini', 1],
        ['Pepperoni', 2]
      ]);

      // Set chart options
      var options = {'title':'How Much Pizza I Ate Last Night',
                     'width':400,
                     'height':300};
```

```
// Instantiate and draw our chart, passing in some options.
var chart = new google.visualization.PieChart(document.getElementById('chart_div'));
chart.draw(data, options);
}
</script>
</head>

<body>
  <!--Div that will hold the pie chart-->
  <div id="chart_div"></div>
</body>
</html>
```

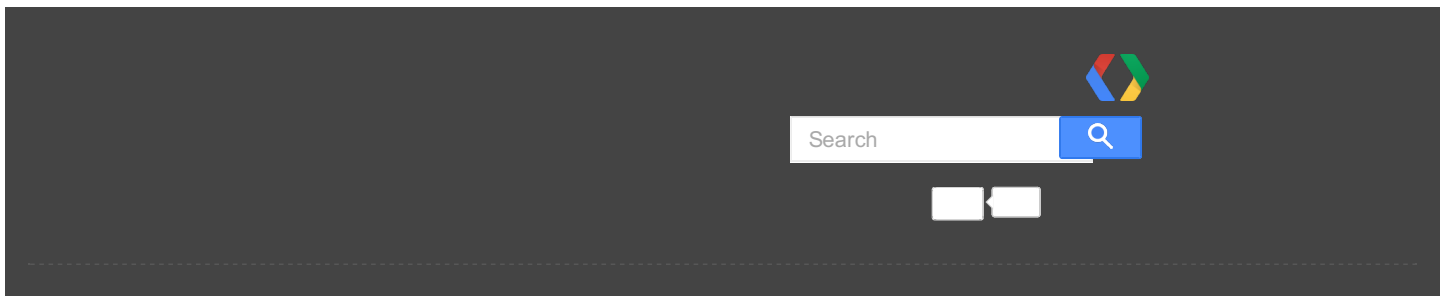

How About a Bar Chart?

Convert the pie chart to a bar chart by replacing `google.visualization.PieChart` with `google.visualization.BarChart` in the code and reloading your browser.

How does it work?
